

Measure of pulses prosperity: An index of Economic Analysis Project

1. Project Overview

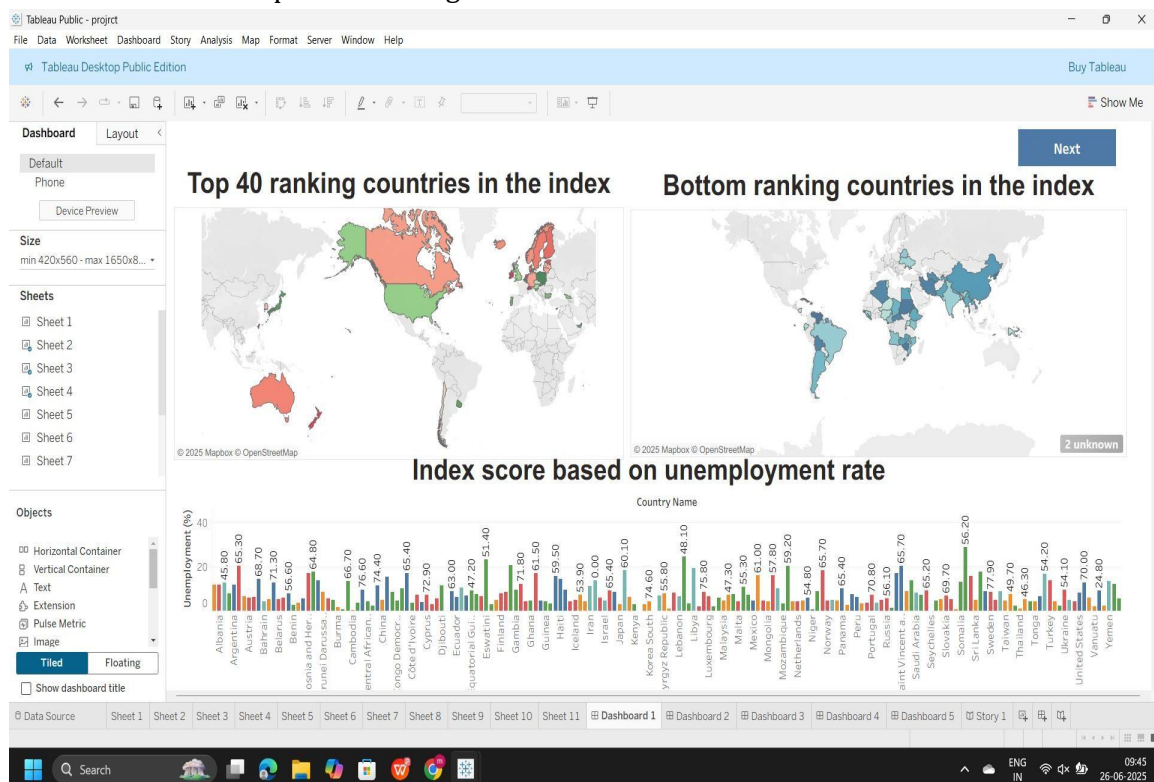

This project presents an interactive data visualization dashboard on measure of pulse prosperity Index using Tableau. The dashboard is embedded into a web page using HTML and JavaScript to allow users to explore the dataset visually. It provides insights on economic freedom metrics across countries through a clean, responsive interface.

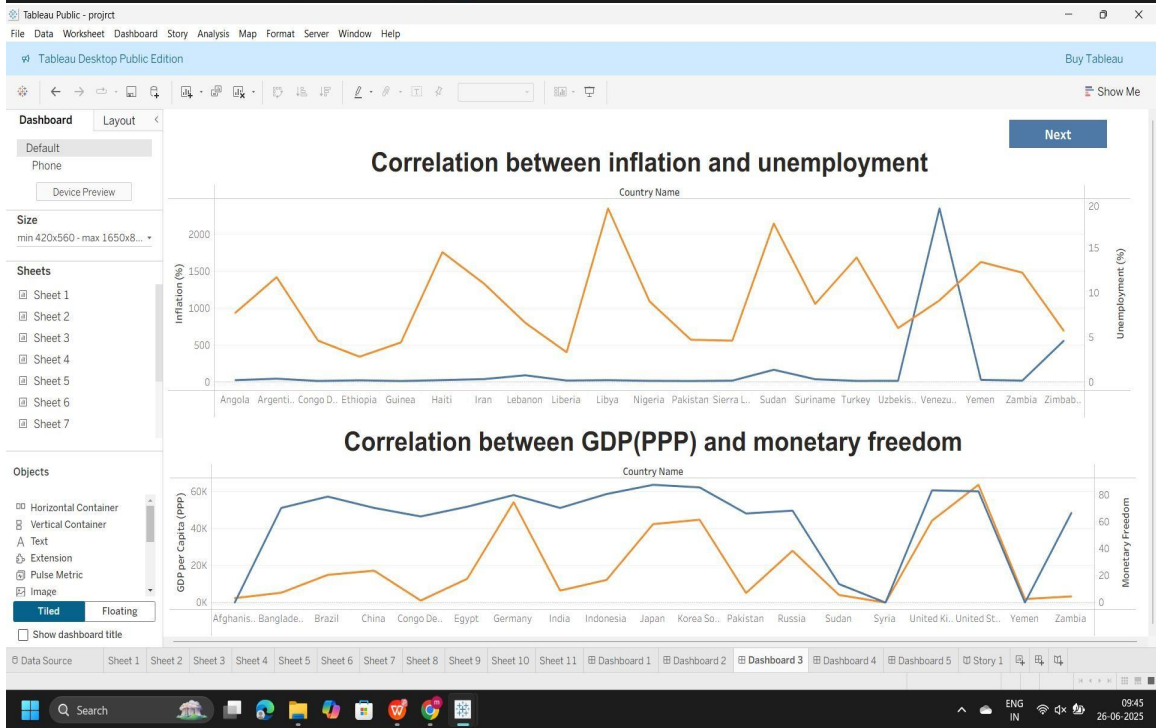

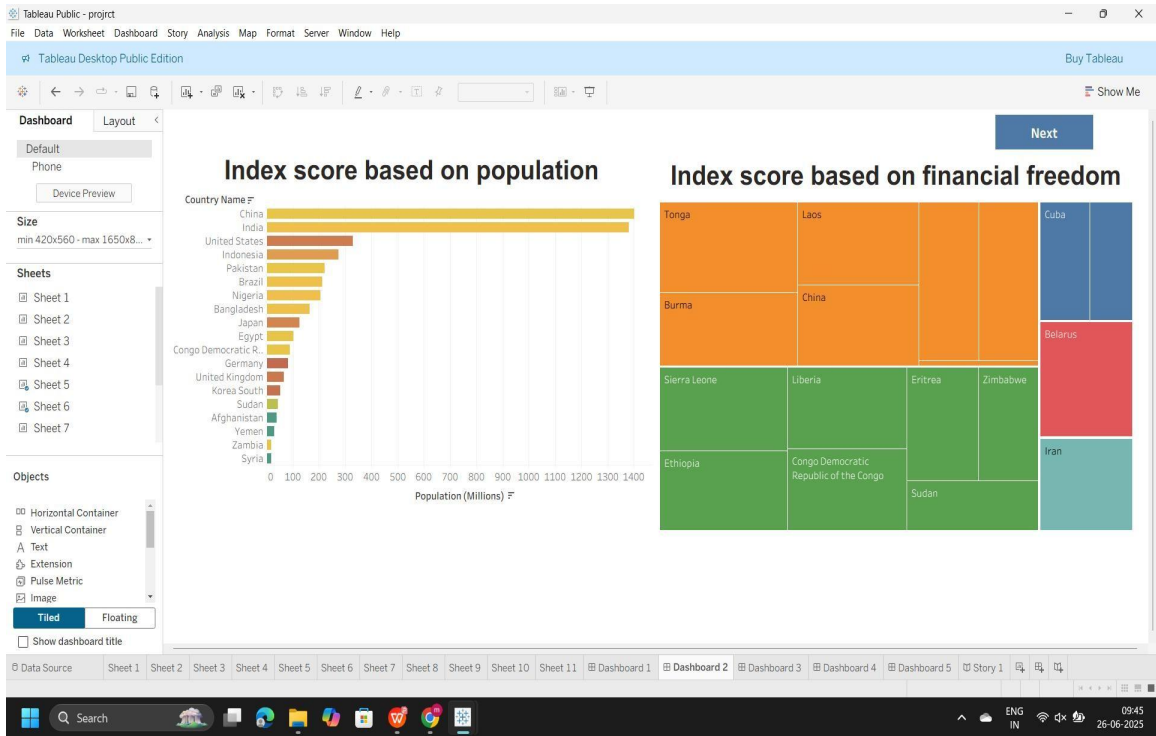

2. Technologies Used

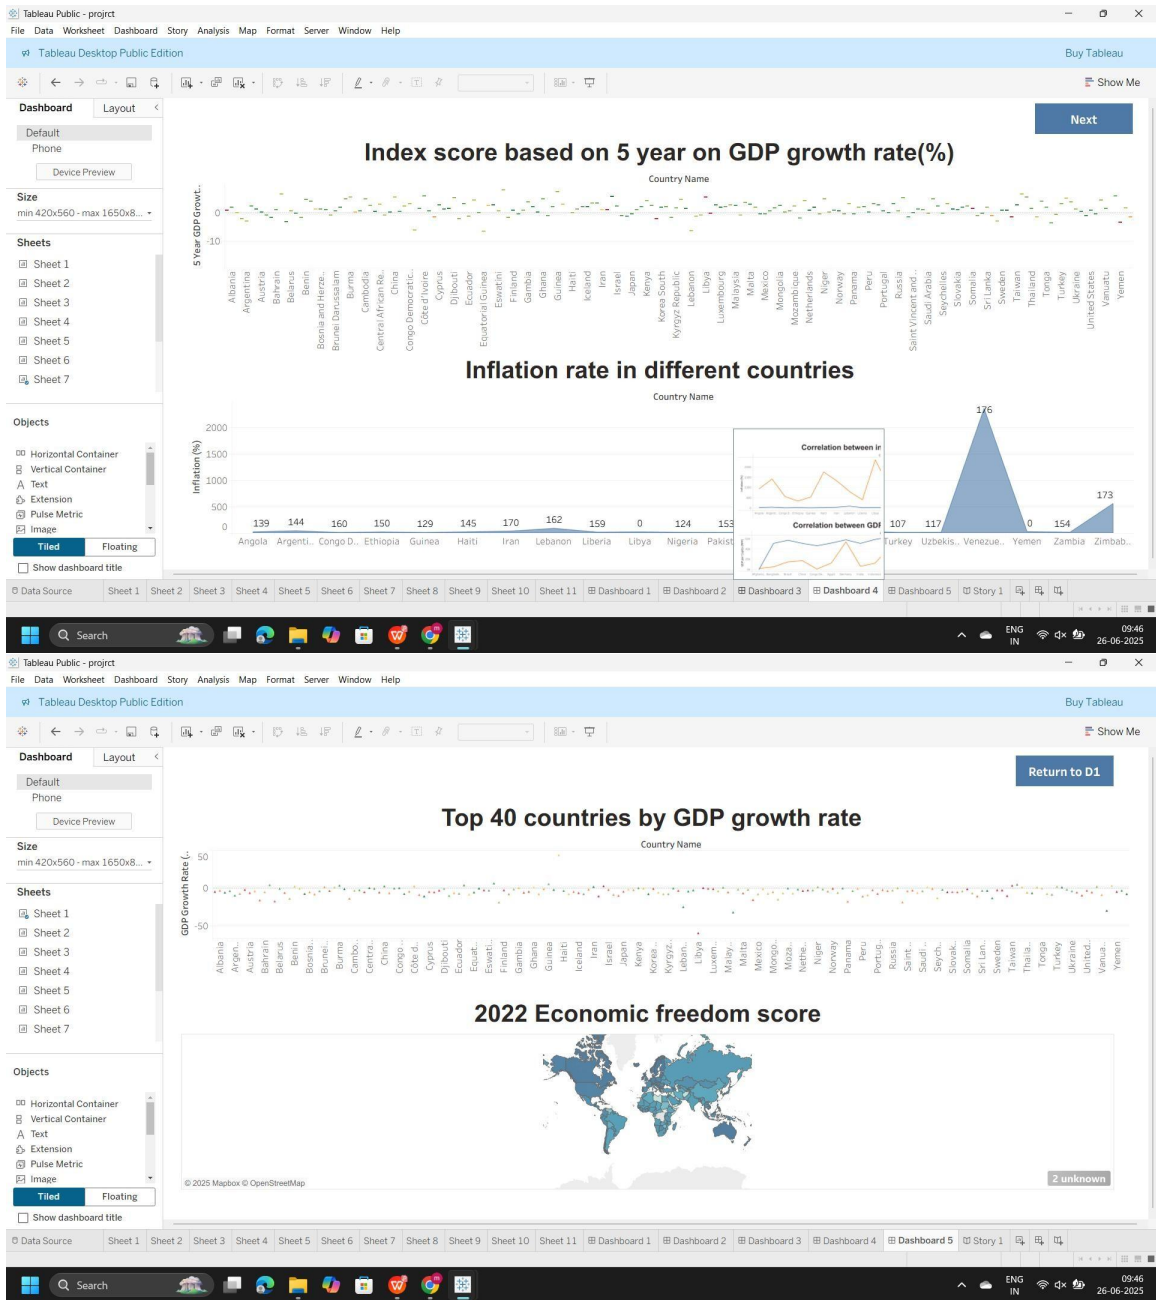

- HTML5
- CSS
- Tableau Public

3. Dashboard Embedding

The dashboard is embedded using Tableau's public. The code includes parameters to load a public Tableau dashboard ('Dashboard1') hosted on Tableau Public. It adapts responsively to screen size and loads a static image in case JavaScript is disabled. The script dynamically sets dimensions for optimal viewing across devices.

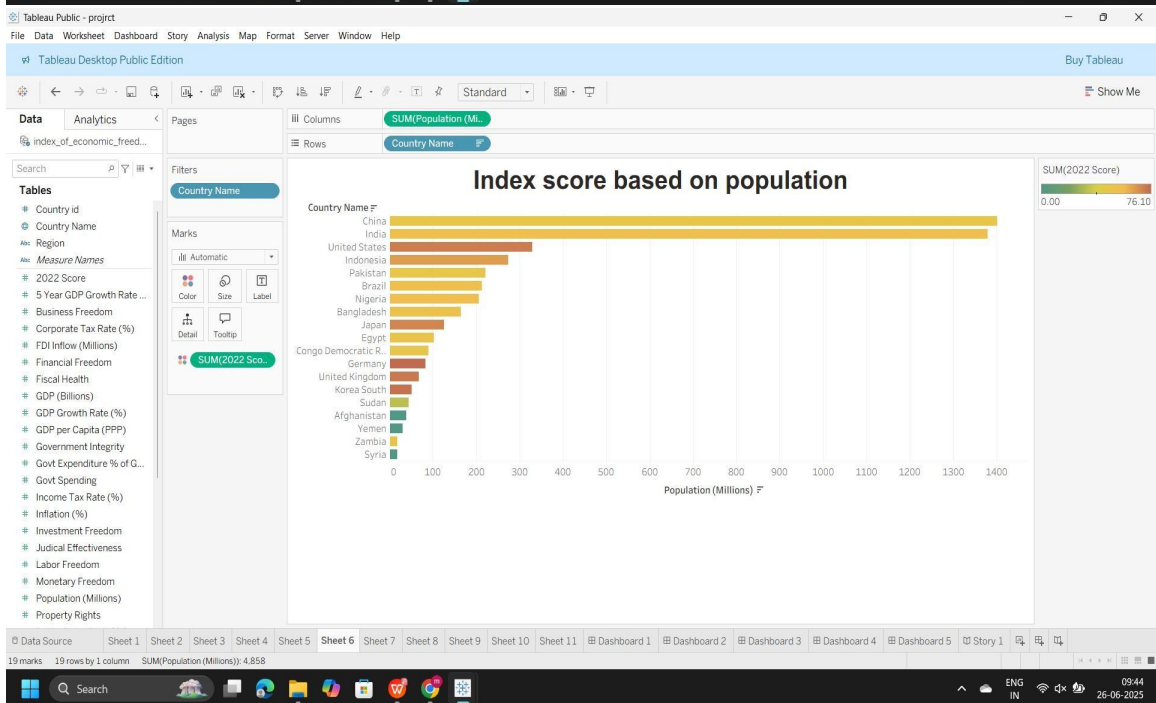

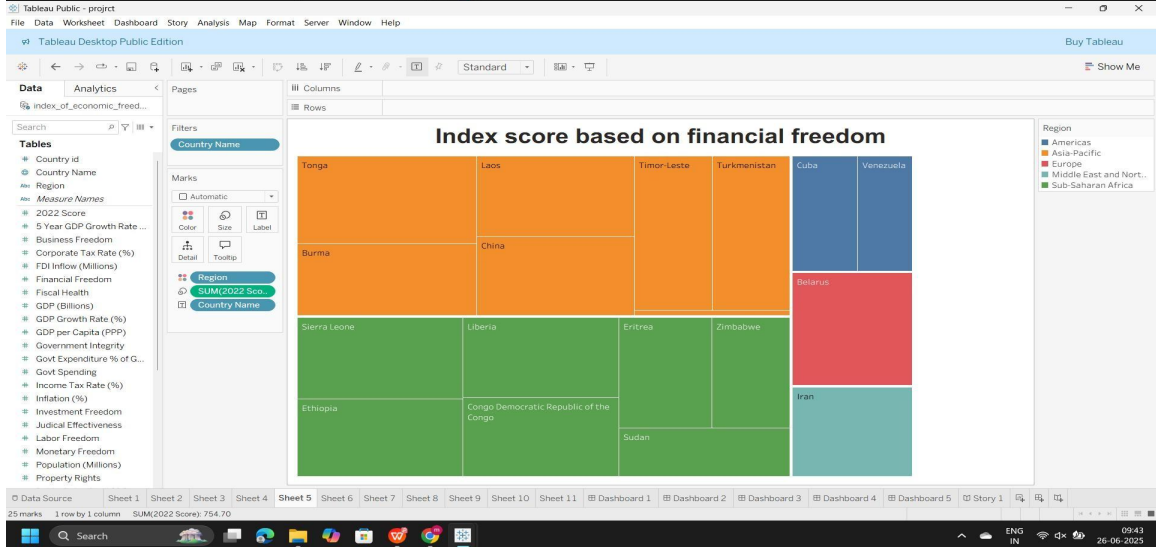

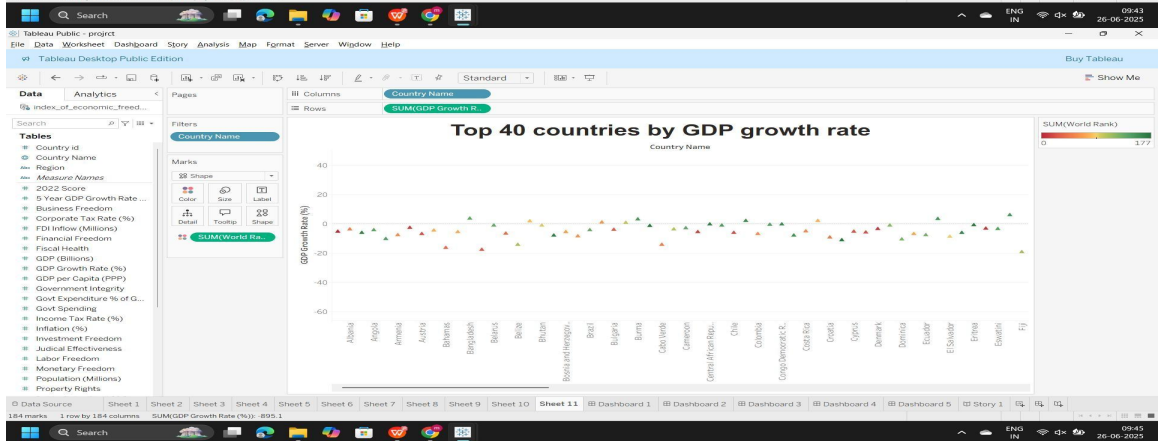

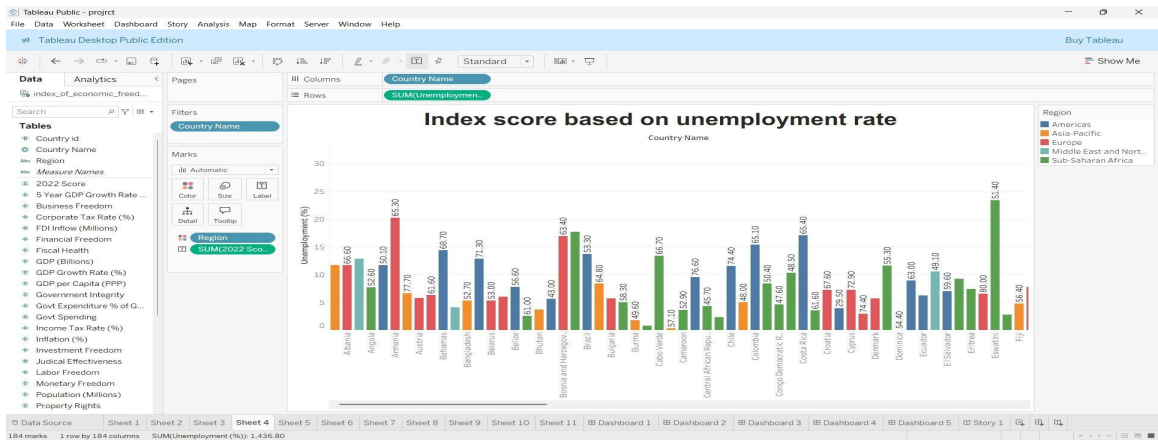

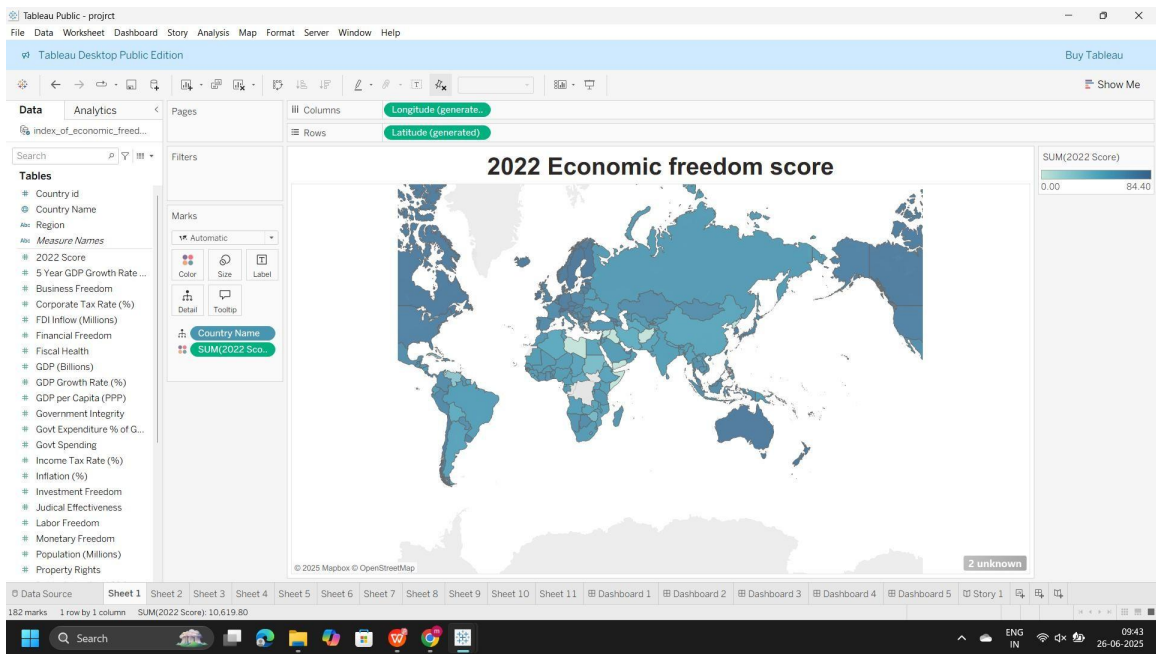

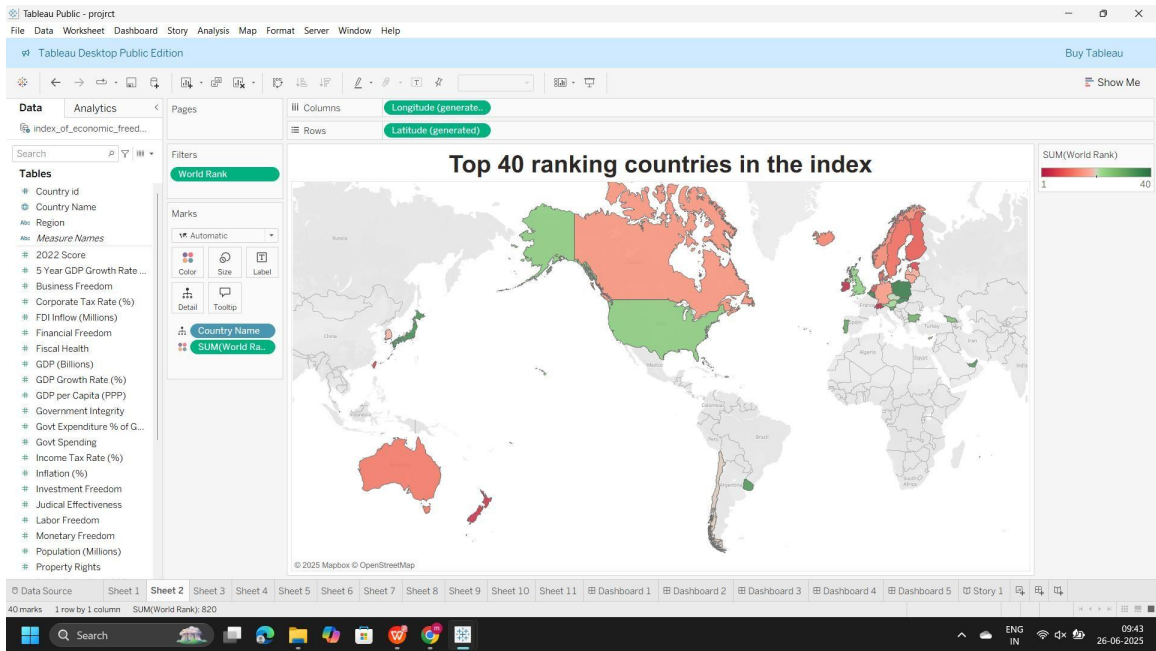

4. Output Screenshot

Below is a placeholder for the output visualization that appears when the HTML file is rendered in a browser.

7. CONCLUSION:

The Economic Freedom Dashboard project effectively combines the power of Tableau's data visualization capabilities with a responsive HTML framework to create an interactive and insightful web-based analytical tool. By embedding the Tableau dashboard within a web page, users are provided with an accessible way to explore and understand global economic freedom indicators across different countries.
